

Measured result on one matched set of ten software-engineering tasks

Green = host-side tests passed. Red = failed or timed out. This is a curated subset, not a general leaderboard.

Worker steps: 987 vs 1,170

Wall time: 26,935 s vs 3,613 s

Cost: \$6.48 vs \$0.90

Result: Hairspring recovered six more tasks, but took more time and cost more. The data does not isolate which subsystem caused the gain.
